

Y08 Assessment Statements

Art

The percentage shown is a summary of progress within a year-long Pop Art project, where a summative assessment/outcome has not yet been completed. Students have been looked at two key artists and have worked in a range of materials (pencil, colour pencil, collage), with more to come (i.e. watercolour and clay). The percentage is therefore a reflection of competence regarding the relevant skills and techniques (research, use of subject language, as well as different drawing techniques).

Computer Science

The percentage score shown is the average of the end of unit assessments taken so far this academic year. For most students this is the average of tests covering e-safety, how computers work and website development. This score is compared with the year group average for comparison purposes.

Drama/Music/Textiles

Students have been assessed on several key competences that relate to the following aspects of each subject area - Music: performing, composing, listening and appraising; Drama: performing, devising, and evaluate. Textiles: Design, manufacture and evaluate.

Each key competency will be assessed against grade descriptors. Student will achieve one of the following grades:

Emerging - a student has not yet met the expected standard of the key competency.

Secure - a student has demonstrated and met the expected standard of the key competency.

Mastered - a student has demonstrated and exceeded the expected standard of the key competency.

You will receive a percentage of the grades achieved.

English

Students are assessed holistically in English in KS3. This takes into account their Reading, Writing and Speaking and Listening skills. Throughout units of learning, students cover a wide range of fiction and non-fiction texts and offer their responses in a variety of ways including detailed written analysis, class discussions and paired work. All of this contributes to the grade given.

Food & Nutrition and Technology

Students have been assessed on the theory knowledge that we have covered up to this point in the year; a percentage score is given. Students have also been assigned bands (mastered, secure, emerging & not yet able) based on percentages related to the whole cohort and linked to how secure their progress is.

Geography/History

The percentage score shown is the average of the mid topic and end of topic assessments taken so far this academic year. For most students this is the average of 3 assessment points covering all of the topics covered so far during this academic year. This score is compared with the class and year group average for comparison purposes (see table below).

Group	History (%)	Geography (%)
8RE	78	56
8AW	72	40
8SJB	68	47
8SNB	70	42
8JC	69	37
Year group	71	44

Maths

The percentage score shown is the average of the topic test taken so far this academic year. For most students this is the average of 5 topic test covering ratio & scale, multiplicative change, multiplying & dividing fractions, working with co-ordinates and representing data. This score is compared with the year group average for comparison purposes.

Science

The percentage score shown is the score for the cumulative assessment that students complete at the end of each term. This assessment checks what knowledge students have retained from their science studies to date. It covers the fields of biology, chemistry, physics and working scientifically. This percentage is compared to the year group average.

Languages

The percentage score shown is for the mixed topic assessment taken in May. The assessments differed slightly between Fr1 and Fr2, who have been taught in smaller groups this year to ensure a similar starting point when they return to full form classes in Year 9. Both assessments checked what knowledge students have retained from their French studies to date; their ability to identify sounds from spoken language; and their ability to extract key information from a written text in the target language. For Fr1 groups, their ability to produce accurate written French, using a model text, was also assessed. This score is compared with the class and cohort averages for comparison purposes (see tables below).

French Group 1 (VH)	(%)
8AW/Fr1 class average	69
8BYC/Fr1 class average	69
8JC/Fr1 class average	62
8RE/Fr1 class average	66
8SNB/Fr1 class average	67
Average for cohort	67

French Group 2 (AW)	(%)
8AW/Fr2 class average	66
8BYC/Fr2 class average	76
8JC/Fr2 class average	75
8RE/Fr2 class average	89
8SNB/Fr2 class average	87
Average for cohort	77

PE

The attainment of students will be reported on the next progress check, once we allocate assessment criteria to the activities and sports that we have completed.
